Subject: RE: next set of Willowbrook EtO data

I appreciate Julie's diligence but the pressure to confirm what we saw on Feb 5 will be intense. We can try to hold off until Friday and hope for the best.

Other EtO priorities (copying Liz also):

- Mike says to set up a call with the Village and Sterigenic's lab people to discuss comparing processes. I'll reach out to Ramboll and GHD (through Tim Halik) to set that up. You and Greg would be the principals to discuss methods and follow ups.
- We need to work with ERG and really focus on the NATTS/UATMP data. I'd have ERG revise their QAPP to support the reporting of EtO to AQS, recognizing that we will need to explicitly brief management on what steps are needed to fully QA and report these data. But getting ERG prepped to spin up on NATTS is a near term priority. I am worried about the ND's that we saw in the initial data screen provided a few weeks ago.

Subject: FW: next set of Willowbrook EtO data

Hi Lew,
Julie will be out of town until Friday. She prefers to report data to us when she has a chance to review them first. So right now the plan is to report data from 1/22 to 2/8 on Friday (2/5 results will be among them). Let me know if that is fine with you.

Thanks,
Doris

Subject: RE: next set of Willowbrook EtO data

Hi Doris,
Sorry it has taken me so long to get back to you, but we will have data reports ready for samples up to and including Feb 5-6 and 8-9.
Please let me know if you have any questions or concerns.
Thanks,
Laura

Subject: next set of Willowbrook EtO data

Hi Laura and Donna,

I have tried Julie's office and it seems she will still be out of office till Friday. So I am reaching out to you to find out when will the next set of data be ready? And if Feb 5-6 data will be among the reported? Since we communicated with the Willowbrook regarding the Feb 5-6 data verbally last Friday, we might need to report the data from that day quickly to the public. Please let me know the status of the next data set.

Thanks,

Xi "Doris" Chen
